Contents

Preface v
List of Acronyms xi

1. **Changing Scenario in Agricultural Extension** 1
2. **Existing Agricultural Research and Extension Systems** 8
   - Changing Agricultural Development Goals vis-á-vis Extension Systems 9
   - Types of Agriculture and Research-Extension Linkage 11
   - Linking Decentralization of Agricultural Extension Systems to Sustainable Agricultural Development 12
   - The Move towards Pluralism for Sustainable Agricultural Development 13
3. **Reforming the Agricultural Extension System in India** 16
   - Definition and Concepts of Reforms 16
   - Relationship between National Agricultural Development Goals and Different Agricultural Extension Objectives and Functions 18
   - Strengths of Indian Extension System 22
   - Weaknesses Constrains of Indian Extension System 22
   - Opportunities and Threats 23
   - Emergence of Pluralistic Extension Systems in India 23
   - National Mission on Agriculture Extension and Technology 27
4. **Public and Private Sector Extension System** 29
   - Public Sector Extension System 29
   - Farmers Portal 30
   - m-Kisan 30
   - Kisan Call Centre 30
   - Kisan TV Channel 31
   - Agriculture Clinic and Agriculture Business Centres (ACABC) 31
   - Strengthening Agri-Clinics and Agri-Business Centres Scheme 32
   - Community Radio Stations 33
   - Private Sector Extension System 33
   - Civil Society (NGO) Extension Systems 35
5. **Technology Transfer vis-à-vis Extension System** 37
   - Technology 37
   - Agricultural Technology 38
   - Types of Agricultural Technology 39

- Appropriate Technology 40
- Management 41
- Technology Management 41
- Technology Development 42
- Designing Agricultural Research and Extension Systems 43
- Technology Flow Processes 43
- The Linkage Problem 44
- Technology Assessment and Refinement (TAR) 45
- Meaning and Significance of Dissemination 46
- Technology Transfer 46
- Technology Transfer Models 49
- Agricultural Knowledge and Information System (AKIS) 51
- From the Technology Transfer Model to an Agricultural Knowledge and Information System (AKIS) 54

6. Genesis of Agricultural Extension **55**
- Agricultural Extension—Definition, Meaning, Concepts 55
- Agricultural Extension System in India 56
- Training and Visit System of Extension 56
- Agriculture Extension System through Media and ICT 57
- Salient Recommendations of Sub-groups on Agricultural Extension 58

7. Participatory Extension Approaches **61**
- Animation Rural 61
- Integrated Rural Development 61
- Key Constraints in Creating a More Integrated Rural Development System 62
- Farmer-Based Extension Organisations 63
- Market-Oriented Extension Approaches 64
  - Commodity-Based Advisory Systems 64
  - Innovative, Market-Driven Extension Approaches 65
- Non-formal Education/Extension Approaches 66
  - Farmer Field Schools 67
  - University-Based Extension 67
  - Concept of Farm School 67
- National Agricultural Extension Project (NAEP) 68

8. Policy Framework for Agricultural Extension **72**
- National Agriculture Technology Project (NATP) 72
- New Scheme of Extension Division of the DAC 72
- Support to State Extension Programmes for Extension Reforms 73
- State level: Inter Departmental Working Group (IDWG) 74
- State Agricultural Management and Extension Training Institute (SAMETI) 75
- Farm Information and Advisory Centre (FIAC) 75

- Block Technology Team 76
- Farmer Advisory Committee 76
- Farmers Organisations (FOs) 77
- Policy Parameters Governing the Cafeteria 79

- Paradigm Shift of Agricultural Extension 79
- Extension Policy Framework 81
  - Policy Reforms 82
  - Public Extension Services 82
  - Private Extension Services 82
  - Mass Media and Information Technology 83
- Institutional Restructuring 84
- Management Reforms in Agricultural Extension 87
- Improving Research-Extension Linkages 89
- Capacity Building of Extension Functionaries 89
- Empowerment of Farmers 90
- Mainstreaming Women in Agriculture 91
- Use of Information Technology 92
- Financial Sustainability and Resource Mobilization 93
- Changing Role of Government 95

9. Innovation System vis-à-vis Farm Sector **97**
- Innovation 97
- Changing approaches for Supporting Agricultural innovation 98
- Innovation System 98
- Agricultural Innovation System 99
- Institution 101
- Institutional innovation 101
- Innovation in Technology Dissemination (ITD) Component of National Agricultural Technology Project (NATP) 102
- Agricultural Technology Management Agency (ATMA) 102
- Participation 106
- Decision-Making 107

10. Conceptual Framework **109**
- Constraints 109
- Strategy for Operationalisation of Recommendations 111
- Conceptual Framework 114
- Some Debatable Issues 116

Bibliography 125

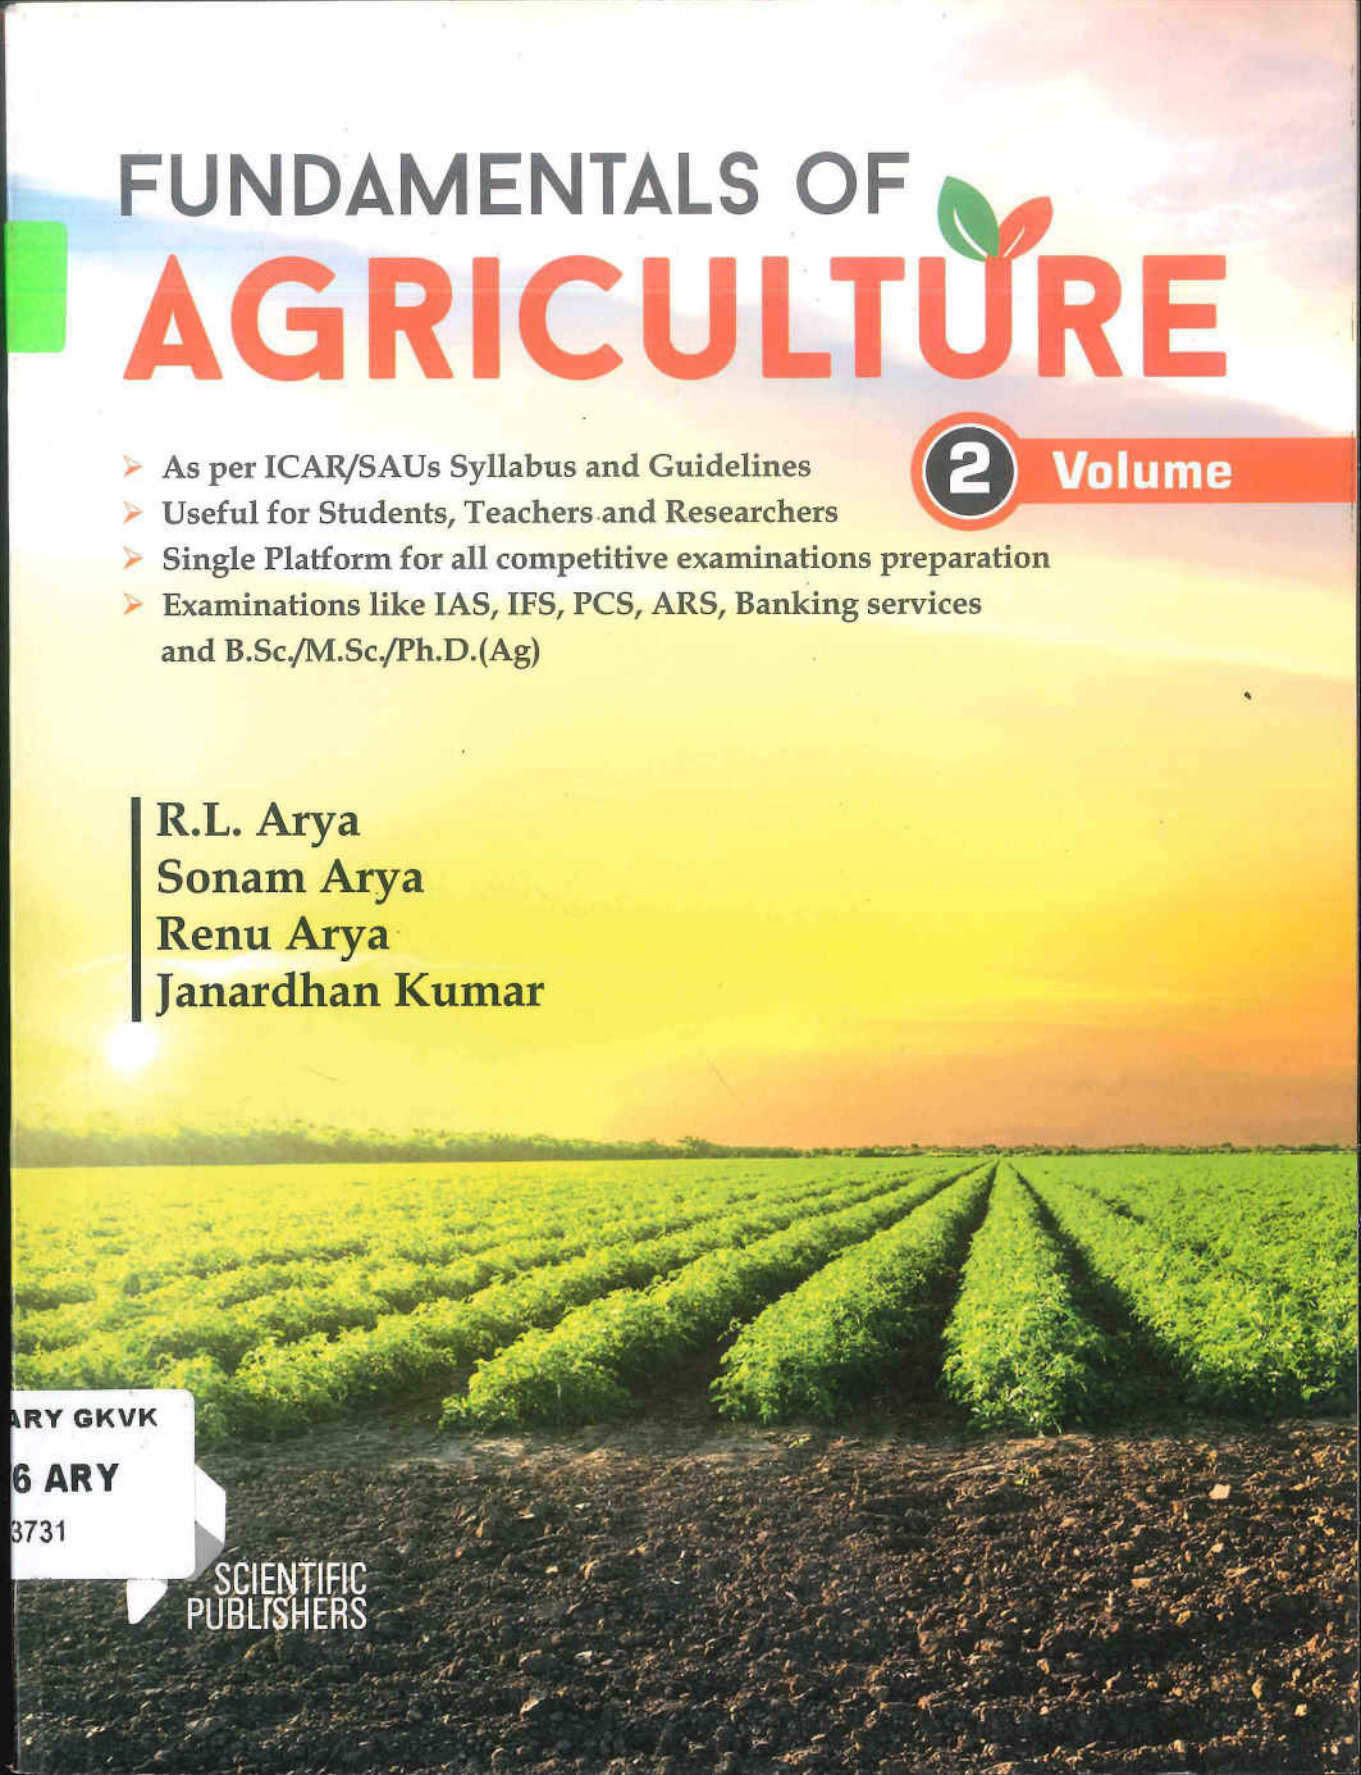

Index 137

FUNDAMENTALS OF AGRICULTURE

2 Volume

- As per ICAR/SAUs Syllabus and Guidelines
- Useful for Students, Teachers and Researchers
- Single Platform for all competitive examinations preparation
- Examinations like IAS, IFS, PCS, ARS, Banking services and B.Sc./M.Sc./Ph.D.(Ag)

CONTENT

Chapter 1 Soil Science and Agricultural Microbiology 1-79

Pedology, Edaphologgy, Soil classification, Soils, Components of soils, Soil minerals, Clay minerals- Silicate clay, Sesquioxide clays, Classification of clay minerals, Silica-sesquioxide ratio, Organic matter, Physical properties of soil, Soil texture, Soil structure, Density of soil, Soil porosity, Soil colour, Soil formation, Parent material, Weathering of rocks, Soil horizon, Soil erosion, Types of soil erosion, Consequences of soil erosion, Causes pf soil erosion, Plant nutrition, Essentiality of elements in plant nutrition, Essential plant nutrients, Forms in which nutrients are utilized by plants, Inventor of essential plant nutrients, Mobility of nutrients, Functions of essential plant nutrients, Deficiency symptoms of plant nutrients, Losses of plant nutrients from soil, Sources of plant nutrients, Nutrient composition of fertilizers, Nutrient composition of wood ashes, Green manuring, Method of fertilizer application, Enhancing fertilizer use efficiency, Nutrient content in dung and urines of different animals, Nitrogen fixation in soil of different green manuring crops, nutrient content in different types of cakes, Classification of nitrogeneous, phosphatic and potassic fertilizers, Nutrient content in different complex fertilizers, Rhizobium species and strains, Fate of plant nutrients, Soil of India, Classification of soil groups according to new classification, Saline, Alkali, Saline-alkali soils, Difference between saline and alkali soils, Sodium absorption ratio, Causes of salt accumulation, Evaluation of saline and alkali soils, Reclamation of saline and alkali soils, Acid soil, Milli-equivalent concept, Land capability classification, IPNS system, Soil nutrient transformation, mineralization of nitrogen, Denitrif-ication, Soil pH, Cation exchange capacity, Anion exchange capacity, Buffering capacity of soil, Biofertilizers, Bacterial biofertilizers, Types of microbial inoculants, Compost inoculants, VAM, BGA, Method of application, Precaution while using biofertilizers, BNF, Important points.

Chapter 2 Horticulture 80-151

Importance and scope of horticulture, Tropical and subtropical fruits – Mango, Banana, Ber, Grapes, Temperate fruits – Apple, Apricot, Cherry, Peach, Pear, Straw berry, Plum, Indian floriculture industry, Export constraints, Rose cultivation, Annuals, Types of annuals, Varieties of annuals, Climbers and creepers, Shrubs, Hedges, Selection of plants, Topiary, Ornamental foliage plants, Propagation of shrubs, Landscape gardening, Natural elements of landscape,

Landscaping principles, Factors affecting the landscape design, Garden styles, Art/ principles of landscape, Some important landscape gardening terms, Green house production technology for important flowers-Rose, Carnation, Chrysanthemum, Gerbera, Green house technology for vegetables, fruit vegetables –Tomato, Brinjal, Chillies, Okra, Cole crops-Cabbage, Cauliflower, Knol-khol, Bulbs, Cucurbits and gourds, water melon, Bonsai, package and practices of fruits and vegetables, Annual flowering plants, Important herbs used in herbaceous border, Fruits and vegetable production, Important points.

Chapter 3 Entomology **152-169**

Pests, causes of outbreaks of pests, Principles for insect-pest control, Natural control, Applied control-Physical, Mechanical, Cultural, Biological control, List of some parasitic fungi, Important insecticides and pesticides, Generations of insecticides, Classification of insecticides, Insecticides and their trade names, Pesticides registered in India, Important point.

Chapter 4 Plant Pathology **170-206**

Diseases-Concept of plant diseases, Way that pathogens causes disease, Classification of diseases, Diseases caused by, Symptoms of plant diseases, Animate causes of plant diseases, Obligate parasites, Facultative parasites, Disease forecasting, Common diseases, Foliage and root diseases, Principles of plant diseases control-Eradication, Exclusion, Protection, Some plant protection chemicals-Seed dressing, Fungicides, Soil fungicides, Spray fungicides, Wound dressing fungicides, post harvest treatments of fruits and vegetables, Antibiotics, Seed treatment of different crops, Nematodes, Symptoms of nematodes attack, Types of parasitism, Important nematodes genera and diseases, Management of nematodes-Physical methods, Cultural methods, Physiological methods, Chemical methods, Biological methods, Host resistance, Regulatory methods, Important diseases of crops-Diseases of cereals, Diseases of oilseed crops, Diseases of vegetable crops, Diseases of fruit crops, Diseases of cash crops, Diseases of pulses, Integrated pest management, Bio-intensive integrated pest management, Important points.

Chapter 5 Agricultural Extension **207-262**

Extension education, Objectives of extension education, Principles of extension education, Difference between formal and informal education, Objective of extension, Basic philosophy of extension, Functions of extension, Extension education process, Teaching-learning process, Role of extension education in development, Criteria of effective extension education, An effective learning situation, Criteria of effective learning, Principles of extension, Dimensions of extension, management of extension, Steps in extension teaching, Competencies needed by the extension agent, Scope of extension, Communication, Communication systems, Key elements of communication, Basic functions of communication, Method of

communication, Elements of extension communication system, A good message should be, Communication methods, Classification of communication methods, Audio-visual aids, Demonstration, Adoption and diffusion of innovations, Research attributes of innovation, The adoption process, Extension programme planning, Components of programme planning, Principles of programmee planning, Agricultural and rural development programmes in India, Information and communication technology, Historical roots of ICT in India, Some innovative rural based initiatives in India, ICT-Some prominent initiatives, Suggestions of effective utilization of ICT, Traditional folk media, Types of traditional media, Forms of indigenous communication, Participatory Research, Cyclic process of PR, GAT model, Use of media in PR.

Chapter 6 Agricultural Economics **263-293**

Scope of agricultural economics, Subject matter of agricultural economics, Nature of agricultural economics, Utility of agricultural economics, Rural credit, Classification of credit, Sources of agricultural credit, Integrated scheme of rural credit, Role of reserve bank of India, State Bank of India, Agricultural cooperative credit societies, Agricultural cooperative credit structure, LLB, NABARD, Land reforms in India, agricultural marketing, Classification of agricultural marketing, Marketing services, Market channels, Method of sale of agricultural produce, Problems in marketing of agricultural produce in India, Farm management, Scope of farm management, Economic principles applied to farm management, Types of farming, Systems of farming, Classification of systems of farming, Agricultural labour, Classification of agricultural labour, Problems of agricultural labours, Suggestion for improvement of labour efficiency, Farm planning and budgeting, Partial budgeting, Complete budgeting, Difference between partial and complete budgeting, Important points.

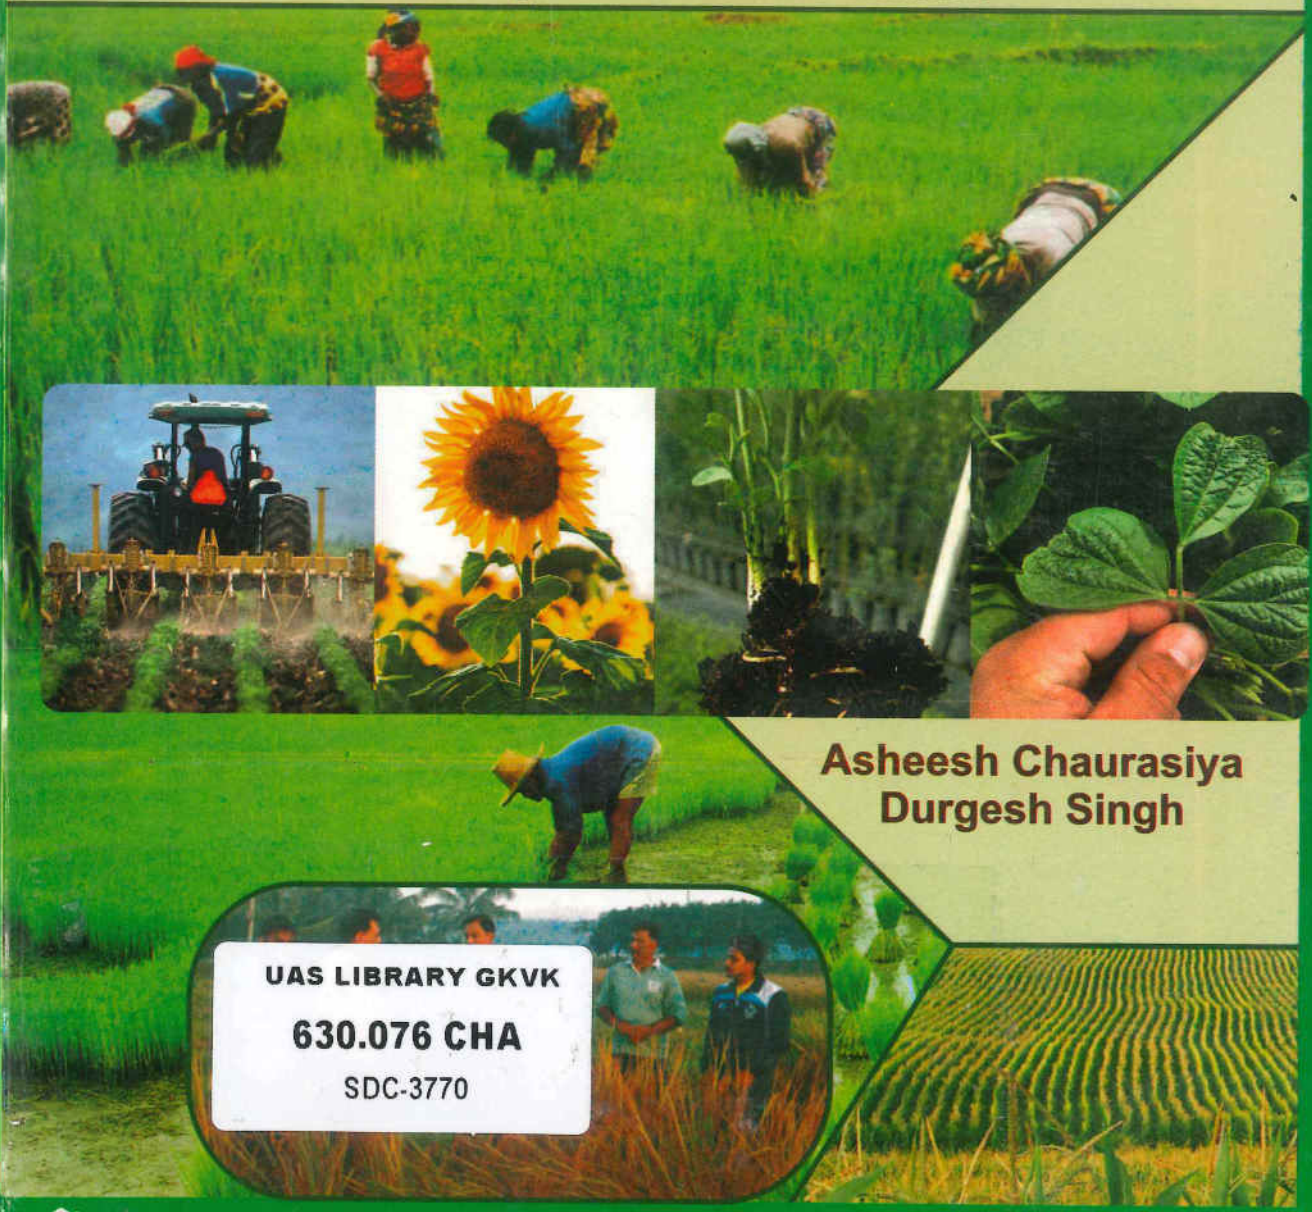

Chapter 7 Agricultural Statistics **294-321**

Function of Statistics, Limitations of statistics, Collections of data, Method of sampling, Classification and tabulation of data, Objectives of classification, Types of classification, Tabulation of data, Measures of Central value, Types of averages, Measurement of dispersion, Coefficient of variation, Skewness, Measures of skewness, Moments, Kurtosis, Correlation, Types of correlation, Regression, X^2 test, Z test, T-test, F-test, Analysis of variance, experimental design - CRD, RBD, LSD, Factorial split plot design, Strip plot design, Missing plot technique, Important point.

GLANCE AGRONOMY

Meant For :

JRF, SRF, NET, ARS, Agri. Universities EXAMS, Bank, Civil and all Other Agriculture Based Examinations

PREFACE (?)

CHAPTER NAME	PAGE NO.
1. CURRENT AFFAIRS OF AGRICULTURE	1-8
2. AGRONOMY	9-98
3. SOIL SCIENCE	99-147
4. EXAM CORNER	149-190

ENCYCLOPAEDIA OF ENTOMOLOGY-5

INSECT ECOLOGY

M. PRAKASH

DISCOVERY

CONTENTS

Chapter 1 1–17

INTRODUCTION

Soil Insects, Soil as a Habitat for Insects, Litter Insects, Soil Insects, Cave Insects, Aquatic Insects, Marine Insects, Extent of Freshwater Habitats, Insect Scavengers, Evolution of Insects in Soil and Water, Evolution of Scavenger

Chapter 2 18–53

ENVIRONMENTAL FACTORS

Temperature, Effect on Developmental Rate, Effects on Migration and Dispersal, Effect on Emergence, Survival at Extreme Temperatures, Effect on Low Temperature, Light, Circadian Rhythms, Photoperiodic Effect, Rate of Development, Reproductive Capacity, Diapause, Occurrence of Diapause, Induction and Termination, Water, Terrestrial Insects, Aquatic Insects, Wind, Migration, Concluding Remarks

Chapter 3 54–83

BIOTIC FACTORS

Food, Quantitative Aspects Between Insects and Plants, Interaction Between Insects and Othr Animals, Intraspecific Interactions, Underpopulation, Overpopulation, Interspecific Interactions, Competition and Coexistence, Predator-Prey Relationships, Insect Diseases, Epizootics, Types of Pathogens, Concluding Remarks

Chapter 4 84–100

INTER-RELATIONSHIP

Symbiotic Relationships, Insects as Vectors of Disease, Inter-Relation with Viruses and Mycoplasmalike Disease Agents, Inter-Relation with Bacteria, Inter-Relation with Protozoa, Inter-Relation with Fungi, Inter-Relation with Helminths

Chapter 5 101–120

CARNIVOROUS INSECTS

Evolution of Entomophagy, Predaceous Insects, Strategies of Insect Predators, Parasitoid Insects, Parasite

Chapter 6 121–168

PLANT EATING INSECTS

Types of Plant Feeding, Chewing Insects, Sucking Insects, Gall Insects, Host Plant Searching and Acceptance, Search for a Suitable Habitat, Settling, Food Plant Acceptance, Nutritional Factors, Artificial Diets, The Advantages of Polyphagy and Monophagy, Transmission of Plant Diseases, Phytotoxemias, Phytophagous Insects in the Paleozoicera, The Flower-Visiting Insects, Modern Phytophagous Insects, Host Specificity, Vectors, Bacterial Diseases, Fungus Diseases, Virus Diseases, Mycoplasmal Diseases

Chpater 7 169–198

LIVING IN GROUPS

The Workers, Life Cycle of the Honey Bee, Ant Workers, Forms of Social Life, Swarming, Slavery, neighbours, Guests and Thieves, Ant Harvesters, Farmers and Hunters, Comm-unication, Bee Language, Winter Swarming, Social Parasites, Termites Order Isoptera, Broader Relationships, Classif-ication

Chapter 8 199–215

POPULATION OF INSECTS

The Objectives, Subject Species, The Time, The Place, Preliminary Studies and Hypotheses, Measurement of Variables, 'Life-Table' Studies, 'Key-Factor' Studeis, The Study of Ecological Processes, Modelling

Chpater 9 216–244

INSECT POLLINATION

Insects and Flowering Plants, The Yucca Moth, Fig Insects, Flower Constancy, Pollination, Importance of Insect Pollination, Importance to Insects, Importance to Plants, Importance to Humans, Pollinators, Hymenoptera, Honey Bees, Bumble Bees, Solitary Bees, Artificially Increasing Bee Populations, Increasing Honey Bee Populations, Increasing Bumble Bees Populations, Artificial Nests for Solitary Bees, Other Hymenoptera, Flowers Pollinated by Hymenoptera, Other Insect Pollinators, Lepidoptera, Diptera, Syrphidae, Bombyludae, Calliphoridae, Tephritidae, Tachinidae, Chironomidae and Tabanidae, Coleoptera, Other Animals as Pollinators, Wind Pollination

Chapter 10 245–262

THE PEST CONTROL

The Appreciation of Pest Situations, Reducing Pest Numbers

Chapter 11 263–282

PROTECTION

Morphological Resistance, Remote Factors, Close-range Factors, Chemical Defences, Nitrogen Compounds, Terpenoids, Phenolics, Proteinase Inhibitors, Host Specificity and Plant Defensive Systems, Insect Growth Regulators, The Evolution of Chemical Defenses, Chemical Defenses in Relation to Stress, Geographic Variation in Plant Chemistry, Nutritional Effects, Escape in Time and Space, Attraction of Natural Enemies, Entomophagous Plants

Chapter 12 283–303

INSECTS AND VERTEBRATES

Insect Predators of Vertebrates, Insect Parasites of Vertebrates, Parasites and their Characteristics, Crawling, Ectoparasites, Myiasis-producing Diptera, Evolution of Insect Parasites, Predation by Insectivorous Vertebrates, Palatable Insects, Industrial Melanism, Unpalatable Insects, Mimicry

Chapter 13 304–345

INSECTS AND MAN

Beneficial Insects, Insects of Commerciall Importance, Insects as

Pollinators, Insects of Biological Control, Insects as Food, Scavenging Insects, Other Benefits of Insects, Pest Insects, Insects Affecting Man Directly, Pests of Domest-icated Animals, Pests of Cultivated Plants, Insect Pests of Stored Products, Pest Control, Legal Control or Regulatory Control, Chemical Control, Biological Control, Genetic Control, Cultural Control, Integrated Control

INDEX 346–356

Insect Pests of Cereals and Their Management

KHANNA PUBLISHERS

Contents

Chapter		Pages
CHAPTER 1. Basics of Mechanical Engineering Design		**1–12**
1.1.	Introduction ...	1
1.2.	Engineering and Attributes of an Engineer ...	2
1.3.	Ideonomics ...	3
	1.3.1. Method of Accumulating Ideas ...	3
1.4	Needs–The Starting Point ...	5
	1.4.1. Variety of Needs ...	5
	1.4.2. Analysis of Statements of Need ...	5
	1.4.3. Needs Analysis ...	6
1.5.	Role of Information in Design Process ...	6
1.6.	Description ...	8
1.7.	Fundamental Rules of Machine Design ...	9
1.8.	Considerations in Design ...	9
1.9.	Some Useful Thoughts in Design ...	10
CHAPTER 2. Procedures in Mechanical Engineering Design		**13–38**
2.1.	Characteristics of Good Design ...	13
2.2.	Design Process ...	13
2.3.	Relation of a Designer with Other Disciplines ...	16
2.4.	Classification of Design Work ...	16
2.5.	Qualities Required in a Designer ...	16
2.6.	Design Procedure ...	17
2.7.	Standardisation ...	22
2.8.	Evolution of Preferred Numbers ...	22
2.9.	Engineering Design Process ...	24
2.10.	Mechanical Engineering Design–Dynamic Profession ...	25
2.11.	Fundamental Steps involved in the Design of a Machine ...	25
2.12.	System Design. ...	26
2.13.	Design by Evolution ...	27
2.14.	Design by Innovation ...	28
2.15.	Designing by Creative Design Routes ...	30
2.16.	Specification ...	31
2.17.	Analysis of Need vis-a-vis Specifications ...	32
2.18.	Standards of Performance ...	33
2.19.	Technical Specification ...	34
2.20.	Standard Specifications ...	35
2.21.	Creating the Shape of Machine Parts ...	35
2.22.	Design and Analysis ...	36

Chapters *Pages*

CHAPTER 3. Structure and Morphology of Design **39–71**

3.1. Introduction ... 39
3.2. Phases involved in Design Project ... 41
3.3. Identification ... 43
3.4. Needs Analysis ... 45
3.5. Care Needed in Reporting the Design ... 46
3.6. Resources and Environmental Factors ... 47
3.7. Morphological Analysis ... 48
3.8. Synectics ... 50
3.9. Qualifying Design Concept ... 50
3.10. Concurrent Engineering ... 51
3.11. Creativity and Creative Designers ... 53
3.12. Adequate Design and Optimum Design ... 54
3.13. Robust Design ... 54
3.14. Taguchi Method ... 55
3.15. Probabilistic Design ... 56
3.16. Economics ... 58
3.17. Optimisation Techniques ... 60
3.18. Selection of Factor of Safety ... 62
3.19. Reliability specification vs. Design Safety Factor ... 63
3.20. Ethics in Design and Engineering ... 65
3.21. Codes and Standards ... 69
3.22. Certification, Registration, Accreditation ... 69
3.23. The Legal Constraints ... 69
3.24. Product Liability ... 70

CHAPTER 4. Engineering Materials and Selection of Materials **72–125**

4.1. Introduction ... 72
4.2. Factors Determining the Choice of Material ... 72
4.3. Properties and Testing of Materials ... 73
4.4. Cast Iron ... 74
4.4.1. Production of different Grades of Cast Iron and their Physical Properties ... 75
4.4.2. Heat Treatment of Cast Irons ... 77
4.4.3. Important Properties of Cast Iron ... 77
4.5. Steel ... 78
4.5.1. Classification of Steels ... 78
4.5.2. Uses of Carbon Steel with Respect to their Carbon Content ... 79
4.5.3. Alloy Steels ... 80
4.5.4. Effect of Alloying Elements on the Properties of Steel ... 81
4.5.5. Table Showing Uses of Various Nickel Chromium Low Alloy-Steels ... 83
4.5.6. Stainless Steels ... 83
4.5.7. Table Showing the Influence of Addition of Metals in Iron for the Formation of Alloy Steels on Their Properties and the Use of Resultant Alloy Steels. ... 84
4.6. Market Forms of Supply of Pig Iron and Carbon Steel ... 84
4.7. Market Forms of Supply of Special Steel and Alloy Steels ... 85

Chapters *Pages*

4.8. Indian Standard (IS) Code for Designation of Steel ... 86
4.9. American Iron and Steel Institute (A.I.S.I.) Method of Classification of Steels ... 90
4.10. Society of Automotive Engineers (SAE) Method of Coding Steels ... 90
4.11. Steel as per BIS ... 91
4.11.1. Steels Specified by Tensile Properties ... 91
4.11.2. Carbon Steels Specified with Chemical Compositions ... 92
4.11.3. Carbon and Carbon Manganese Free Cutting Steels ... 94
4.11.4. Low Alloy Steels ... 95
4.11.5. High Alloys Steels–Stainless and Heat Resisting Steels ... 98
4.11.6. Carbon and Alloy Tool Steels ... 100
4.12. Heat Treatment ... 105
4.12.1. Annealing ... 105
4.12.2. Spheroidising ... 106
4.12.3. Normalising ... 106
4.12.4. Hardening ... 107
4.12.5. Tempering ... 107
4.12.6. Austempering of Steels ... 108
4.12.7. Mar-tempering ... 108
4.12.8. Case Hardening ... 108
4.12.9. Various Processes of Case Hardening ... 109
4.13. Copper ... 112
4.14. Lead ... 113
4.15. Aluminium ... 113
4.16. Nickel ... 113
4.17. Zinc ... 114
4.18. Tin ... 114
4.19. Molybdenum ... 114
4.20. Alloys of Copper ... 114
4.21. Alloys of Nickel ... 117
4.22. Bearing Metal ... 119

CHAPTER 5. Manufacturing Considerations in Design **126–181**

5.1. Designing for Manufacture & Assembly ... 126
5.2. Recyclability of Materials ... 127
5.3. Designing for Basic Process ... 127
5.4. Designing for Casting ... 128
5.5. Designing a Part for Easier Machining ... 131
5.6. Designing for Heat Treating ... 132
5.7. Designing for Steel Casting ... 134
5.8. Designing for Die Casting ... 134
5.9. Designing for Forging ... 135
5.10. Designing for Welding ... 135
5.11. Designing for Environment (DFE) ... 135
5.12. Economics in Design ... 136
5.13. Safety Standards ... 137
5.14. Organising for Incorporation of Alteration ... 137

Chapters		Pages
5.15.	Alter-Technic Procedure	... 137
5.16.	Aesthetics	... 138
5.17.	Ergonomics and Human Factors of Design	... 140
5.18.	Noise	... 148
5.19.	Human Errors	... 149
5.20.	Methods to Prevent Human Errors	... 149
5.21.	Human-Reliability Analysis Method	... 150
5.22.	Human Factors in Maintenance and Maintainability	... 150
5.23.	Human Factors in Design	... 150
5.24.	Safety	... 151
5.25.	Thermal Comfort	... 151
5.26.	Lighting	... 151
5.27.	Standardisation	... 152
5.28.	Practical Tips for Problems Encountered in Design	... 152
	5.28.1. Clamping Devices	... 152
	5.28.2. Friction Clamping Devices	... 153
	5.28.3. Latching Devices	... 153
	5.28.4. Provision for Locking Shaft	... 154
	5.28.5. Permitting Shaft to have Axial Movement	... 154
	5.28.6. Clamping Uneven Workpieces	... 154
	5.28.7. Securing Handle to Shaft	... 155
	5.28.8. Prevention of Reverse Rotation	... 155
	5.28.9. Prevention of Backlash	... 157
	5.28.10. Protecting Light Duty Drives Against High Torque	... 157
	5.28.11. Use of Metallic Bellows for Sealing Shafts, Expansion Joints, Couplings etc.	... 158
5.29.	Tackling Corrosion	... 158
5.30.	Improvements in Design of Mechanical Parts	... 159
5.31.	Variable Speed Mechanical Drives	... 161
	5.31.1. Cone Drives	... 161
	5.31.2. Disc Drives	... 161
	5.31.3. Ring Drives	... 162
	5.31.4. Spherical Drives	... 162
	5.31.5. Multiple Disc Drives	... 162
	5.31.6. Impulse Drives	... 162
5.32.	Positive Infintely Variable (PIV) Drive	... 163
5.33.	Geneva Mechanisms	... 163
5.34.	Long Dwell Mechanisms	... 164
5.35.	Limits, Fits and Surface Finish	... 168
5.36.	Indian Standard (IS 919)	... 169
5.37.	Types of Tolerances	... 172
5.38.	Geometrical Tolerances	... 173
5.39.	Interchangeable Manufacture and Selective Assembly	... 173
5.40.	Types of Fits	... 174
5.41.	Surface Finish	... 174
5.42.	Surface Roughness	... 176
5.43.	Statements of Surface Roughness	... 179

Chapters		Pages
CHAPTER 6. Stress and Strain Analysis		**182–247**
6.1.	International System of Units (SI)	... 182
6.2.	Simple Stresses and Strains	... 185
6.3.	Bars of Composite Section	... 187
6.4.	Stresses Due to Change of Temperature	... 191
6.5.	Poisson's Ratio	... 194
6.6.	Relation between E, G and K	... 195
6.7.	Force, Work, Torque and Energy	... 196
6.8.	Direct and Bending Stresses	... 197
	6.8.1. Eccentric Loading	... 197
	6.8.2. Wind Pressure	... 198
6.9.	Impact and Shock-Loading	... 205
	6.9.1. Stress Produced in case of Gradual, Sudden, Impact and Shock Loading	... 206
6.10.	Principal Planes and Principal Stresses	... 209
	6.10.1. Principal Planes	... 209
	6.10.2. Principal Stresses	... 209
	6.10.3. Principal Planes and Principal Stresses	... 210
	6.10.4. Procedure to Determine Principal Stresses	... 213
6.11.	Torsion of Shaft	... 215
6.12.	Bending of Beams	... 217
6.13.	Stresses in Rotating Bodies	... 229
6.14.	Struts and Columns	... 230
6.15.	Buckling	... 239
6.16.	Press/Shrink Fits	... 241
6.17.	Contact Stress	... 241
6.18.	Preloading and Residual Stresses	... 241
6.19.	Framed structures and Design of Members	... 242
CHAPTER 7. Failure Analysis		**248–282**
7.1.	Introduction	... 248
7.2.	Stress-Strain Diagram	... 248
7.3.	Types of Loads	... 249
7.4.	Endurance Limit of Materials	... 250
	7.4.1. Determination of Endurance Limit of Ductile Materials	... 251
	7.4.2. Graphical Determination of the Endurance Limit	... 252
7.5.	Stress Concentration	... 258
	7.5.1. Notch Sensitivity	... 262
	7.5.2. Reduction of Stress Concentration	... 263
7.6.	Factor of Safety	... 263
7.7.	Types of Failure	... 266
7.8.	Theories of Failure	... 266
7.9.	Failure Criteria	... 270
	7.9.1. Failure Analysis and Hazards Analysis	... 270
	7.9.2. Brittle Fracture	... 272
	7.9.3. Linear Damage Rule	... 272

Chapters		Pages
7.10.	Fracture Mechanics	... 274
	7.10.1. Fracture Mechanics and Fracture Control	... 274
7.11.	State of Stress in a Component Having Crack	... 275
	7.11.1. Prediction of Strength of Cracked Parts	... 275
7.12.	Factors Affecting Fatigue Response	... 276
	7.12.1. Fracture Mechanics Approach to Fatigue	... 277
7.13.	Wear	... 279
	7.13.1. Wear Control Methods	... 280
	7.13.2. Fretting Failure	... 280
	7.13.3. Stress Corrosion Cracking	... 280
CHAPTER 8. Reliability & Quality		**283–322**
8.1.	System Reliability	... 283
8.2.	Probability and Its Application to Series and Parallel Reliability (Redundancy)	... 283
8.3.	Reliability Analysis	... 284
8.4.	Reliability Analysis of Systems	... 285
8.5.	System Reliability for Series and Parallel Configuration	... 287
	8.5.1. Reliability of system in which r out of n components should function properly	... 287
8.6.	Optimum Reliability	... 293
8.7.	Reliability Allocation	... 294
8.8.	Repairable System Allocation Method	... 294
8.9.	Reliability Analysis Techniques	... 295
8.10.	Probability Evaluation	... 295
8.11.	Fault Diagnostics and Trouble Shooting	... 300
8.12.	System Maintenance	... 300
8.13.	Trouble Shooting System	... 301
8.14.	Trouble Shooting Aids	... 303
8.15.	Maintainability	... 303
8.16.	Reliability	... 305
8.17.	International Standards on Quality Management System (ISO 9001-2000)	... 314
8.18.	Principles upon which ISO-9001: 2000 is based	... 314
8.19.	Implementing an ISO 9001: 2000	... 315
8.20.	Quality System Documentation	... 316
8.21.	Preparation of Quality Manual	... 316
8.22.	Preparation of Quality Plans	... 317
8.23.	Internal Audit	... 318
CHAPTER 9. Seals & Fasteners		**323–336**
9.1.	Introduction	... 323
9.2.	Mechanical Shaft Seals	... 323
	9.2.1. Fundamental Principles of Mechanical End Face Seals	... 323
9.3.	Dynamic Shaft Seals	... 327
9.4.	Split-ring Seals	... 327
9.5.	Labyrinth Seals	... 328

Chapters		Pages
9.6.	Compression Packings	... 329
9.7.	Moulded Packings	... 329
9.8.	Gaskets	... 330
9.9.	Fasteners	... 330
	9.9.1. Threaded Fasteners	... 330
	9.9.2. Bolts, Screws and Studs	... 330
	9.9.3. Tapping Screws	... 331
	9.9.4. Set Screws	... 332
	9.9.5. Studs	... 332
	9.9.6. Nuts and Inserts	... 332
	9.9.7. Materials	... 333
9.10.	Non-threaded Fasteners	... 334
	9.10.1. Rivets	... 334
	9.10.2. Washers	... 335
	9.10.3. Pins	... 336
	9.10.4. Special Purpose Fasteners	... 336
CHAPTER 10. Riveted Joints		**337—382**
10.1.	Introduction	... 337
10.2.	Forms of Riveted Joints	... 339
10.3.	Failure of Riveted Joint	... 342
10.4.	Design of Riveted Joint	... 343
10.5.	Design of Riveted Joint as per I.B.R. (Indian Boiler Regulations)	... 345
10.6.	Efficiency of a Riveted Joint	... 346
CHAPTER 11. Welded Joints		**383—408**
11.1.	Introduction	... 383
11.2.	Advantages of Welded Joints	... 384
11.3.	Types of Welded Joints	... 384
	11.3.1. Standard Symbols for Welded Joints	... 386
	11.3.2. Supplementary Weld Symbols	... 386
	11.3.3. Standard Elements and their Location on a Welding Symbol	... 387
11.4.	Design of Welded Joints	... 387
11.5.	Welded Joints of Unsymmetrical Sections Subjected to Axial Loads	... 392
11.6.	Eccentrically Loaded Welds	... 393
	11.6.1. A General Case of Eccentric Loading	... 394
CHAPTER 12. Bolted Joints and Brackets		**409—467**
12.1.	Introduction	... 409
12.2.	Screw Thread Terminology	... 410
12.3.	ISO Metric Threads	... 412
	12.3.1. Basic Profile	... 412
12.4.	Diameter and Pitch Combinations	... 413
12.5.	Design Profile	... 414
12.6.	Tolerancing System	... 416

Chapters		Pages
12.7.	Screwed Fasteners	... 419
	12.7.1. Bolts	... 419
	12.7.2. Nuts	... 421
	12.7.3. Studs	... 423
	12.7.4. Screws	... 424
	12.7.5. Holding Power of Set-screws	... 425
	12.7.6. Washers	... 425
	12.7.7. Design of a Nut	... 426
12.8.	Locking Devices	... 426
12.9.	Design of Bolted Joints	... 429
	12.9.1. Bolts Subjected to Steady Loads	... 429
	12.9.2. Effect of Dynamic Loading	... 432
12.10.	Bolts of Uniform Strength	... 433
12.11.	Design Stress	... 434
12.12.	Brackets	... 446
12.13.	Eccentrically Loaded Bolted Connections	... 449
CHAPTER 13. Power Screws		**468–499**
13.1.	Introduction	... 468
13.2.	Threads	... 468
13.3.	Efficiency of Square-Threaded Screws	... 469
13.4.	Self Locking Screws	... 471
13.5.	Coefficient of Friction	... 472
13.6.	Collar Friction	... 472
13.7.	Differential Screws	... 473
13.8.	Procedure for Design of Power Screws and Screw Jacks	... 475
CHAPTER 14. Pipe Joints		**500–522**
14.1.	Introduction	... 500
14.2.	Design of Pipe	... 500
14.3.	Pipe Joints and Fitting	... 502
14.4.	Bell and Spigot Joints	... 502
14.5.	Welded Joints	... 503
14.6.	Soldered Fittings	... 504
14.7.	Screwed Connections	... 505
14.8.	Compression Fittings	... 506
14.9.	Pipe Connectors	... 509
14.10.	Flanges	... 511
14.11.	Expansion Joints	... 513
14.12.	Hydraulic Pipe Joints for High Pressures	... 514
CHAPTER 15. Pins, Rings, Knuckle Joints and Cotter Joints		**523–548**
15.1.	Pins	... 523
15.2.	Hooke's Joint or Universal Coupling	... 525
15.3	Retaining Rings (Snap Rings)	... 526
15.4	Joint of Suspension Link	... 527
15.5	Knuckle Joint	... 528

Chapters		Pages
15.6.	Cotter Joints	... 532
15.7.	Design of Strap End Form of a Connecting Rod	... 539
15.8.	Cotters for Foundation Bolts	... 540
15.9.	Friction Joints	... 542
15.10.	Turn Buckles	... 543
CHAPTER 16. Handwheels and Handles		**549–557**
16.1.	Machine Handwheels	... 549
16.2.	Handles	... 549
16.3.	Hand Lever	... 551
16.4.	Foot Lever	... 552
16.5.	Cranked Lever for Hand Operated Hoisting Winch	... 553
CHAPTER 17. Levers		**558–575**
17.1.	Introduction	... 558
17.2.	Design of Levers	... 559
CHAPTER 18. C-Clamps and Machine Members		**576–596**
18.1.	Introduction	... 576
18.2.	Machine Frames	... 578
18.3.	Columns and Struts	... 590
	18.3.1. Empirical Formulae for Columns	... 590
	18.3.2. Rankine's Formula	... 590
	18.3.3. Gordon's Formula	... 591
	18.3.4. Tetmajer's Formula	... 592
	18.3.5. Johnson's Formula	... 592
18.4.	Eccentrically Loaded Columns	... 593
CHAPTER 19. Springs		**597–665**
19.1	Introduction	... 597
19.2.	Commonly used Terms in Springs	... 599
19.3.	Helical Springs	... 600
	19.3.1. Stress Analysis	... 600
	19.3.2. Deflection Analysis	... 602
	19.3.3. Significance of Spring Index	... 604
	19.3.4. Solid Length, Free Length and Active Number of Turns	... 604
	19.3.5. Materials	... 605
	19.3.6. Materials and Deflection in Springs	... 607
	19.3.7. Solid Stress	... 607
	19.3.8. Eccentric Loading and Buckling of Springs	... 608
	19.3.9. Helical Tension Springs	... 609
	19.3.10. Design Procedure for Helical Springs	... 610
	19.3.11. Springs in Combination	... 611
	19.3.12. Surge in Spring	... 613
	19.3.13. Spring Fatigue Failure	... 614
	19.3.14. Springs Subjected to Variable Loads	... 616

Chapters		Pages
19.4.	Flat or Leaf Springs	... 637
19.4.1.	Equations for Leaf Springs	... 639
19.4.2.	Equalised Stress in Spring Leaves	... 641
19.5.	Coned Disc Springs (Belleville springs)	... 649
19.6.	Conical and Volute Springs	... 652
19.7.	Torsional Helical Springs	... 653
19.8.	Flat Spiral Torsion Springs	... 654
19.9.	Wave-washer Springs	... 658
19.10.	Non-metallic Springs	... 658
19.11.	Some Important Design Hints	... 659
CHAPTER 20. Shafts		**666–701**
20.1.	Introduction	... 666
20.2.	Materials	... 666
20.3.	Design Considerations	... 666
20.4.	Determination of Shaft Sizes on the Basis of Strength	... 667
20.5.	Shaft Sizing Based on Stiffness	... 669
20.6.	Standard Size of Shaftings	... 670
20.7.	Effect of Keyways	... 670
20.8.	Critical Speed of Shafts	... 670
CHAPTER 21. Keys and Keyways		**702–716**
21.1.	Introduction	... 702
21.2.	Classification of Keys	... 702
21.2.1.	Prestressed Keys	... 702
21.2.2.	Non-prestressed Keys	... 707
21.2.3.	Heavy-duty Keys	... 709
21.3.	Stress Concentration	... 710
21.4.	Splines	... 713
21.4.1.	Introduction	... 713
21.4.2.	Classification of Splines	... 714
21.4.3.	Stresses	... 715
CHAPTER 22. Flywheels		**717–744**
22.1.	Introduction	... 717
22.2.	Turning Moment Diagram	... 717
22.3.	Maximum Fluctuation of Energy	... 718
22.4.	Design of Flywheels	... 721
CHAPTER 23. Couplings		**745–766**
23.1.	Introduction	... 745
23.2.	Rigid Couplings	... 746
23.2.1.	Sleeve or Collar Coupling	... 746
23.2.2.	Flange Compression Couplings	... 748
23.2.3.	Clamp-type Couplings	... 748
23.2.4.	Flange Coupling	... 750

Chapters		Pages
23.3.	Flexible Couplings	... 753
23.3.1.	Flexible Couplings Employing Rigid Members	... 753
23.3.2.	Flexible Couplings with Resilient Parts	... 755
23.4.	Slip Coupling	... 762
CHAPTER 24. Clutches		**767–801**
24.1.	Introduction	... 767
24.2.	Rigid Body Clutches	... 767
24.3.	Friction Clutches	... 768
24.3.1.	Plate Clutch	... 768
24.3.2.	Uniform Wear Clutches	... 770
24.3.3.	Multidisc Clutches	... 771
24.3.4.	Correction for Variation of μ with r	... 771
24.3.5.	Friction Materials and Friction	... 772
24.3.6.	Cone Clutches	... 774
24.3.7.	Thermal Problems in Clutch Design	... 775
24.4.	Centrifugal Clutches	... 776
24.5.	Electromagnetic Friction Clutches	... 776
24.6.	Eddy-current Clutches	... 776
24.7.	Slip Clutches	... 777
24.8.	Magnetic Particle Clutches	... 777
CHAPTER 25. Brakes		**802–841**
25.1.	Introduction	... 802
25.2.	Friction Materials	... 804
25.3.	Band Brakes	... 805
25.4.	Differential Band Brake	... 806
25.5.	Band and Block Brake	... 807
25.6.	Block Brakes	... 808
25.7.	Self-energising and Self-locking Brakes	... 811
25.8.	Automotive Shoe Brakes	... 811
CHAPTER 26. Ball and Roller Bearings		**842–869**
26.1.	Introduction	... 842
26.2.	Construction and Classification of Ball Bearings	... 843
26.3.	Types of Roller Bearings	... 846
26.4.	Bearing Series	... 847
26.5.	Bearing Life	... 848
26.6.	Static Load Capacity	... 848
26.7.	Methods of Evaluating Static Load Ratings of Rolling (Ball and Roller) Bearings	... 849
26.8.	Equations for Calculating Basic Static Load Rating (Co) (N)	... 849
26.9.	Equations for Calculating Static Equivalent Load (P0)	... 850
26.10.	Dynamic Load Capacity	... 851
26.11.	Equivalent Dynamic Load	... 851

Chapters		Pages
26.12.	Basic Dynamic Load Rating C	... 851
26.13.	Selection of Bearings from Tables	... 852
26.14.	Selection of Bearings from Rating Tables of SKF	... 852
26.15.	Installation and Maintenance of Rolling Bearings	... 853
CHAPTER 27. Sleeve Bearings		**870–904**
27.1.	Introduction	... 870
27.2.	Types of Bearings	... 870
27.3.	Behaviour of a Journal in its Bearing	... 870
27.4.	Load Carrying Capacity of Hydrodynamic Journal Bearings	... 874
	27.4.1. Bearing Modulus	... 879
	27.4.2. Coefficient of Friction	... 879
	27.4.3. Friction Torque	... 882
27.5.	Oil Flow and Temperature Rise	... 883
27.6.	Bearing Materials	... 884
27.8.	Procedure for Design of Sleeve Bearings	... 886
27.9.	Boundary Lubrication	... 887
27.10.	Oil-less Bearing	... 889
27.11.	Hydrostatic Bearings	... 889
	27.11.1. Application of Hhydrostatic Bearings	... 889
	27.11.2. Performance of Hydrostatic Bearings	... 890
27.12.	Hydrodynamic Gas Bearings	... 890
27.13.	Design of Sleeve Bearings	... 891
27.14.	Solid Journal Bearings	... 900
27.15.	Split Bearing : Plummer Block	... 900
27.16.	Design of Bearing Caps and Bolts	... 901
27.17.	Foot Step or Pivot Bearings	... 901
27.18.	Collar Bearings	... 902
CHAPTER 28. Belting		**905–955**
28.1.	Introduction	... 905
28.2.	Angle of Contact and Length of Belts	... 907
28.3.	Design of Belts	... 908
	28.3.1. Belt Joints and Fasteners	... 912
	28.3.2. Belt Speed	... 912
	28.3.3. Coefficient of Friction Between Belt and Pulley	... 912
	28.3.4. Condition for the Transmission of Maximum Power	... 912
	28.3.5. Belt Tension	... 913
28.4.	Belt Fatigue	... 914
28.5.	Action of Belt on Pulley	... 914
28.6.	Flat Belt Materials	... 915
28.7.	Power Ratings of Flat Belts	... 916
28.8.	Pivoted Motor Bases	... 917
28.9.	Pulleys	... 918
28.10.	V-Belts	... 921
28.11.	V-Belt Design	... 923
28.12.	Toothed Belts	... 924

Chapters		Pages
28.13.	Design of Flat Belts Using Manufacturers' Tables	... 924
28.14.	Design of V-belts using Manufacturer's Data	... 926
28.15.	Rope Drives with Grooved Pulleys	... 950
CHAPTER 29. Wire Ropes		**956–972**
29.1.	Introduction	... 956
29.2.	Construction	... 956
29.3.	Designation	... 957
29.4.	Stresses in Wire Rope	... 959
29.5.	Accessories	... 962
29.6.	Passenger Lift	... 963
CHAPTER 30. Chain Drives		**973–985**
30.1.	Introduction	... 973
30.2.	Chordal Action in Chains	... 974
30.3.	Construction of Chains	... 974
30.4.	Designation of Chains	... 975
30.5.	Selection and Design of Chains	... 976
	30.5.1. Recommended Teeth on Sprocket	... 977
	30.5.2. Chain Velocity and Drive Ratio	... 978
	30.5.3. Length of chain and centre distance	... 978
	30.5.4. Failure of the Chain Drives	... 979
	30.5.6. Power Transmitted by Chains	... 980
CHAPTER 31. Spur, Helical, Bevel and Worm Gears		**986–1081**
31.1.	Introduction	... 986
31.2.	Involute Curve	... 987
31.3.	Terminology of Gear Tooth	... 988
31.4.	Interference in Gears	... 992
31.5.	Gear Materials	... 992
31.6.	Source of Errors in Manufacturing Gears	... 995
	31.6.1. Gearing Operation Requirements	... 995
	31.6.2. Kinematic Accuracy	... 996
	31.6.3. Smoothness of Gear Operation	... 997
	31.6.4. Tooth Bearing Contact	... 997
	31.6.5. Accuracy of Gears for Various Applications	... 998
31.7.	Design of Gears	... 998
	31.7.1. Permissible Working Stress	... 1000
	31.7.2. Velocity Factor	... 1001
	31.7.3. Service Factor	... 1002
	31.7.4. Dynamic Loads on Gear Teeth	... 1005
	31.1.5. Stress Concentration	... 1007
	31.7.6. Design of Spur Gears for Wear	... 1007
31.8.	Design Procedure for Gears	... 1016
	31.8.1. Design of Gears Considering Hardness	... 1016
	31.8.2. Wear Resistance of Gear Teeth	... 1020
31.9.	AGMA Bending Equation	... 1021

Chapters		Pages
31.10.	Gear Wheel Design	... 1022
31.11.	Internal Gears	... 1024
31.12.	Approximate Method for Design of Spur Gears	... 1028
31.13.	Method of Calculating the Rating of Machine Cut Spur and Helical Gears	... 1029
31.13.1.	Formulae	... 1030
31.14.	Gear Boxes	... 1031
31.14.1.	Components of Gear Box	... 1032
31.14.2.	Guidelines for Designing Gear Box	... 1032
31.15.	Helical Gears	... 1036
31.16.	Bevel Gears	... 1044
31.16.1.	Strength of Bevel Gears	... 1047
31.16.2.	Dynamic and Wear Loads	... 1048
31.16.3.	Bearing Loads on Bevel Gears	... 1048
31.17.	Worm Gears	... 1054
31.17.1.	Design of Worm Gearing	... 1057
31.17.2.	Strength of Teeth	... 1058
31.17.3.	Bearing Forces	... 1059
CHAPTER 32. Cams		**1082–1113**
32.1.	Introduction	... 1082
32.2.	Classification of Cams	... 1082
32.3.	Followers	... 1085
32.4.	Empirical Design	... 1086
32.5.	Definitions	... 1087
32.6.	Motion of the Follower	... 1089
32.7.	Study of Basic Curves for Dwell-Rise-Dwell Cams	... 1095
32.8.	Determination of Cam Size	... 1097
32.9.	Cam Profile Layout	... 1098
32.9.1.	To draw the profile of the Cam when the line of stroke of the follower passes through the centre of the Cam shaft for the given displacement diagram with knife edge follower.	... 1099
32.9.2.	To draw the profile of the Cam when the line of stroke of the follower is offset for the given displacement diagram with knife edge follower.	... 1100
32.9.3.	Disc Cam with Reciprocating Flat-face Follower	... 1102
32.9.4.	Cam Layout with Pressure Angle Held within Practical Limits	... 1103
CHAPTER 33. Electric Motors and their Selection		**1114–1125**
33.1.	Types of Electric Motors and Their Characteristics	... 1114
33.2.	Series Wound D.C. Motors	... 1114
33.3.	Shunt-Wound D.C. Motors	... 1115
33.4.	Compound-Wound D.C. Motors	... 1115
33.5.	Induction Motors	... 1115
33.5.1.	Squirrel Cage Induction Motors	... 1115
33.5.2.	Wound Rotor Induction Motors	... 1116
33.5.3.	High Frequency Induction Motors	... 1117
33.6.	Synchronous Motors	... 1117

Chapters		Pages
33.7.	Single Phase A.C. Motors	... 1117
33.8.	Terminology	... 1119
33.9.	Factors Affecting Selection of Motors	... 1119
CHAPTER 34. Vibrations and their Isolation		**1126–1131**
34.1.	Introduction	... 1125
34.2.	Vibration Prevention	... 1126
34.2.1.	Removal of Exciting Cause	... 1126
34.2.2.	Elimination Through Tuning	... 1126
34.3.	Isolation Efficiency	... 1127
34.4.	Vibration Reduction by Isolation	... 1128
34.5.	Steel Spring Mountings	... 1128
34.6.	Vibration Damping	... 1129
34.7.	Damped Spring Mountings	... 1129
34.8.	Elastic Suspension Materials	... 1130
CHAPTER 35. Internal Combustion Engines		**1132–1137**
35.1.	Introduction	... 1132
35.2.	Engine Design	... 1136
35.3.	Similar Engines	... 1137
CHAPTER 36. Cylinder and Cylinder Head		**1138–1142**
CHAPTER 37. Pistons		**1143–1166**
37.1.	Introduction	... 1143
37.2.	Thickness of Piston Head	... 1143
37.3.	Piston Rings	... 1144
37.4.	Piston Skirt	... 1145
CHAPTER 38. Connecting Rods		**1154–1167**
CHAPTER 39. Crank Shafts		**1168–1183**
39.1.	Introduction	... 1168
CHAPTER 40. Pressure Vessels		**1184–1200**
40.1.	Introduction	... 1184
40.2.	Classification of Pressure Vessels	... 1184
40.3.	Design of Pressure Vessels	... 1185
40.4.	Thin Pressure Vessels	... 1185
40.5.	Design of Thick Cylinders	... 1187
40.6.	Compound Cylinder (Shrink-fit in Built-up Cylinder)	... 1188
40.7.	Cylinder Heads (Ends of Pressure Vessels)	... 1189

Chapters *Pages*

CHAPTER 41. Steam Stop Valve **1201–1211**

CHAPTER 42. Design Project **1212–1244**

42.1. Design of Mechanical Rope Drum Type of Hoist ... 1237

CHAPTER 43. Building Design **1245–1253**

43.1. Requirements of a Building ... 1245
43.1.1. Shelter from External Climate ... 1245
43.1.2. Fire Resistance ... 1245
43.1.3. Sound Insulation ... 1245
43.1.4. Load Bearing Capacity ... 1246
43.1.5. Excavation ... 1246
43.1.6. Foundation ... 1246
43.1.7. Quality ... 1247
43.1.8. Building Mycology ... 1247
43.2. Structural Systems ... 1247
43.3. Building Structures ... 1247
43.4. Planning in Construction ... 1248
43.5. Cost Control in Construction Projects ... 1249
43.6. Responsibilities of Architect ... 1249
43.7. Defects in Buildings ... 1249
43.8. Test Programmes in Construction Work ... 1250
43.9. Quality Management in Building Construction Work ... 1251
43.10. Glossary for Building Design ... 1252

Questions for Interviews in Machine Design **1254–1302**

Tables **1303–1354**

Table 1 : Metric—SI Conversion Table ... 1305
Table 2 : Sheet and Wire Gauge ... 1306
Table 3 : Preferred Numbers of the Basic Series (rounded off) ... 1306
Table 4 : Preferred Sizes for Wrought Metal Products ... 1307
Table 5 : Conversion of Hardness Numbers and Their Correlation with Tensile Strength ... 1308
Table 6 : Interpretation of Indian Standard Designation of Steel and Aluminium ... 1310
Table 7 : Mechanical Properties of High Tensile Cast Steel ... 1312
Table 8 : Properties of Mild Steel ... 1313
Table 9 : Carbon Constructional Steels ... 1315
Table 10 : Carbon Steels : Properties ... 1316
Table 11 : Alloy Steels : Properties (IS : 1570) ... 1319
Table 12 : Some Important Indian Standard Specifications with Similar Foreign Specifications ... 1323
Table 13 : Indian Standard Steels and Their Nearest Equivalents of Other Counters ... 1325
Table 14 : Rolled Steel Equal Angles Dimensions and Properties ... 1327
Table 15 : Rolled Steel Beams Dimensions and Properties ... 1328

Chapters *Pages*

Table 16 : Rolled Steel Bars Dimensions and Properties ... 1330
Table 17 : Rolled Steels BARS—Dimensions and Properties ... 1331
Table 18 : Dimensions for Cylindrical Pins ... 1333
Table 19 : Dimensions of Parallel Keys and Keyways ... 1334
Table 20 : Gib-Head Keys and Keyways ... 1335
Table 21 : Taper Keys and Keyways ... 1337
Table 22 : Parallel Keys and Keyways for Machine Tools ... 1339
Table 23 : Threads for Bolts and Nuts-Nuts ... 1340
Table 24 : Standard Pipe Threads ... 1341
Table 25 : Dimensions for Oil Seals ... 1342
Table 26 : Dimensions for Chamfer on the Shaft for Mounting the Seals ... 1344
Table 27 : O-Rings for Sealing Moving Parts ... 1345
Table 28 : Mass and Breaking Strengths of Steel Wire Ropes for Haulage Purposes in Mines ... 1346
Table 29 : Mass and Breaking Load of Steel Wire Ropes for General Engineering Purposes (Fibre Core) ... 1347
Table 30 : Weights and Breaking Strengths of Ropes 6 × 19 Group ... 1348
Table 31 : Wire Rope Data ... 1348
Table 32 : Factor of Safety of Wire Ropes Based on Ultimate Strength ... 1348
Table 33 : Design Data for Sliding Bearings ... 1349
Table 34 : Dimensions for Typical Single-Row Radial Ball Bearings and Basic Load Capacity C for a Rating Life of 10^6 Cycles ... 1350
Table 35 : Foot Mounted Motors, 3 Phase (Class E insulation) ... 1352
Table 36 : Flange Mounted Motor, 3 Phase (Class E Insulation) ... 1353

Volume-II

A TEXTBOOK OF
APPLIED ENTOMOLOGY-II
Insects of Economic Importance

Gursharan Singh
K.P. Srivastava
G.S. Dhaliwal

KALYANI

GKVK

CONTENTS

Ch.No.	Chapter	Pages

PART–I : INTRODUCTION

1. ECONOMIC IMPORTANCE OF INSECTS **3–23**

Beneficial Insects
- Commercially Valuable Products
- Insect Pollinations
- Entomophagous Insects
- Weed Killers
- Soil Builders
- Scavengers
- Insects as Food
- Educational and Scientific Value
- Human Therapy
- Source of Dyes
- Aesthetic Value

Harmful Insects
- Plant Pests
- Human and Animal Pests

Conclusions

PART–II : AGRICULTURAL ENTOMOLOGY

2. PESTS OF CEREALS AND MILLETS **27–46**

Rice
Maize
Sorghum
Wheat

3. PESTS OF SUGARCANE **47–58**

4. PESTS OF PULSES **59–67**

5. PESTS OF OILSEEDS **68–80**

Groundnut
Mustard
Castor
Sesame

Ch.No.	Chapter	Pages
	Linseed Safflower Sunflower	
6.	**PESTS OF VEGETABLES** Solanaceous Vegetables Brinjal Potato Sweet Potato Tomato Malvaceous Vegetables Okra Cruciferous Vegetables Cabbage, Cauliflower, Raddish Turnip and Carrot Cucurbitaceous Vegetables Lilliaceous Vegetables Onion and carlic Trapaceous Vegetables Water-nuts	81–97
7.	**PESTS OF FRUITS** Tropical and Sub-tropical Fruits Mango Citrus Grapevine Guava Banana Ber Pomegranate Temperate Fruits	98–129
8.	**PESTS OF MUSHROOMS**	130–134
9.	**PESTS OF FIBRE CROPS** Cotton Jute Sunnhemp Mesta	135–152
10.	**PESTS OF PLANTATION CROPS** Coconut Tea Coffee Cashewnut Arecanut Rubber	153–167

Ch.No.	Chapter	Pages
11.	**PESTS OF SPICES**	168–175
	Cardamom Large Cardamom Chillies Black Pepper Turmeric Ginger Coriander Cinnamon	
12.	**PESTS OF ORNAMENTAL PLANTS**	176–181
13.	**POLYPHAGOUS PESTS**	182–195
	Locusts Grasshoppers Termites Hairy Caterpillars Cutworms	
14.	**NON-INSECT PESTS OF CROPS**	196–213
	Rodents Other Mammals Birds Snails and Slugs Mites Nematodes	
15.	**PESTS OF STORED PRODUCTS**	214–227
16.	**INSECT VECTORS OF PLANT DISEASES**	228–238
	Viruses Phytoplasmas Bacteria Fungi Management of Vectors and Diseases	
	PART–III : FOREST ENTOMOLOGY	
17.	**PESTS OF FOREST TREES**	241–247
	Defoliators Sap-Suckers Borers Soil Insects Management of Forest Insect Pests	

Ch.No. Chapter Pages

PART–IV : HOUSEHOLD, VETERINARY AND MEDICAL ENTOMOLOGY

18. HOUSEHOLD PESTS 251–258

19. PESTS OF FARM ANIMALS 259–274

Blood-Sucking Flies
Myiasis Flies
- Bot Flies
- Blow Flies
- Flesh Flies

Lice
- Sucking Lice
- Biting Lice

Fleas
Arachnids
- Ticks
- Mites

20. PESTS OF PUBLIC HEALTH IMPORTANCE 275–288

Mosquitoes
House Flies
Sand Flies
Eye Flies
Lice
Bed Bugs
Rat Flea

PART–V : INDUSTRIAL ENTOMOLOGY

21. APICULTURE 291–311

Honey Bees
Beekeeping
Bee Products
Bee Poisoning
Beekeeping in India
Beekeeping Research and Development

22. SERICULTURE 312–325

Silkworms
Mulberry Sericulture

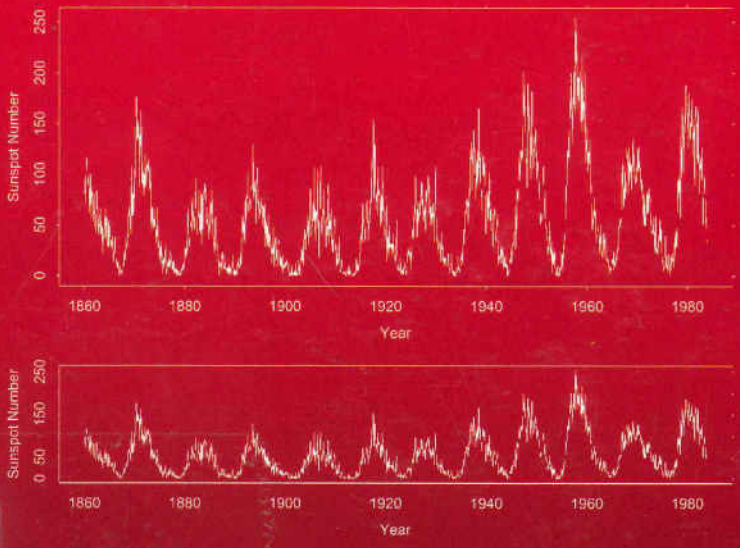

Ch.No.	Chapter	Pages
	Non-Mulberry Sericulture Sericulture in India Sericulture Research and Development	
23.	**LAC CULTURE** Lac Insect Lac Cultivation Lac Culture in India Lac Research and Development	326–334
24.	**MASS PRODUCTION OF PARASITOIDS AND PREDATORS**	335–345
	SELECTED BIBLIOGRAPHY	346–348
	INDEX	349–359

Taylor & Francis Group
A CHAPMAN & HALL BOOK

Special Indian Edition

Contents

Preface to the Sixth Edition xi

Abbreviations and Notation xiii

1 Introduction 1
- 1.1 Some Representative Time Series 1
- 1.2 Terminology 5
- 1.3 Objectives of Time-Series Analysis 6
- 1.4 Approaches to Time-Series Analysis 8
- 1.5 Review of Books on Time Series 8

2 Simple Descriptive Techniques 11
- 2.1 Types of Variation 11
- 2.2 Stationary Time Series 13
- 2.3 The Time Plot 13
- 2.4 Transformations 14
- 2.5 Analysing Series that Contain a Trend 15
- 2.6 Analysing Series that Contain Seasonal Variation 20
- 2.7 Autocorrelation and the Correlogram 22
- 2.8 Other Tests of Randomness 28
- 2.9 Handling Real Data 29

3 Some Time-Series Models 33
- 3.1 Stochastic Processes and Their Properties 33
- 3.2 Stationary Processes 34
- 3.3 Some Properties of the Autocorrelation Function 36
- 3.4 Some Useful Models 37
- 3.5 The Wold Decomposition Theorem 50

4 Fitting Time-Series Models in the Time Domain 55
- 4.1 Estimating Autocovariance and Autocorrelation Functions 55
- 4.2 Fitting an Autoregressive Process 59
- 4.3 Fitting a Moving Average Process 62
- 4.4 Estimating Parameters of an ARMA Model 64
- 4.5 Estimating Parameters of an ARIMA Model 65
- 4.6 Box–Jenkins Seasonal ARIMA Models 66

4.7 Residual Analysis 67
4.8 General Remarks on Model Building 70

5 Forecasting 73
5.1 Introduction 73
5.2 Univariate Procedures 75
5.3 Multivariate Procedures 87
5.4 Comparative Review of Forecasting Procedures 90
5.5 Some Examples 98
5.6 Prediction Theory 103

6 Stationary Processes in the Frequency Domain 107
6.1 Introduction 107
6.2 The Spectral Distribution Function 107
6.3 The Spectral Density Function 111
6.4 The Spectrum of a Continuous Process 113
6.5 Derivation of Selected Spectra 114

7 Spectral Analysis 121
7.1 Fourier Analysis 121
7.2 A Simple Sinusoidal Model 122
7.3 Periodogram Analysis 126
7.4 Some Consistent Estimation Procedures 130
7.5 Confidence Intervals for the Spectrum 139
7.6 Comparison of Different Estimation Procedures 140
7.7 Analysing a Continuous Time Series 144
7.8 Examples and Discussion 146

8 Bivariate processes 155
8.1 Cross-Covariance and Cross-Correlation 155
8.2 The Cross-Spectrum 159

9 Linear Systems 169
9.1 Introduction 169
9.2 Linear Systems in the Time Domain 171
9.3 Linear Systems in the Frequency Domain 175
9.4 Identification of Linear Systems 190

10 State-Space Models and the Kalman Filter 203
10.1 State-Space Models 203
10.2 The Kalman Filter 211

11 Non-Linear Models 217
11.1 Introduction 217
11.2 Some Models with Non-Linear Structure 222

11.3 Models for Changing Variance 227
11.4 Neural Networks 230
11.5 Chaos 235
11.6 Concluding Remarks 238
11.7 Bibliography 240

12 Multivariate Time-Series Modelling 241
12.1 Introduction 241
12.2 Single Equation Models 245
12.3 Vector Autoregressive Models 246
12.4 Vector ARMA Models 249
12.5 Fitting VAR and VARMA Models 250
12.6 Co-integration 252
12.7 Bibliography 253

13 Some More Advanced Topics 255
13.1 Model Identification Tools 255
13.2 Modelling Non-Stationary Series 257
13.3 Fractional Differencing and Long-Memory Models 260
13.4 Testing for Unit Roots 262
13.5 Model Uncertainty 264
13.6 Control Theory 266
13.7 Miscellanea 268

14 Examples and Practical Advice 277
14.1 General Comments 277
14.2 Computer Software 278
14.3 Examples 280
14.4 More on the Time Plot 290
14.5 Concluding Remarks 292
14.6 Data Sources and Exercises 292

A Fourier, Laplace and z-Transforms 295

B Dirac Delta Function 299

C Covariance and Correlation 301

D Some MINITAB and S-PLUS Commands 303

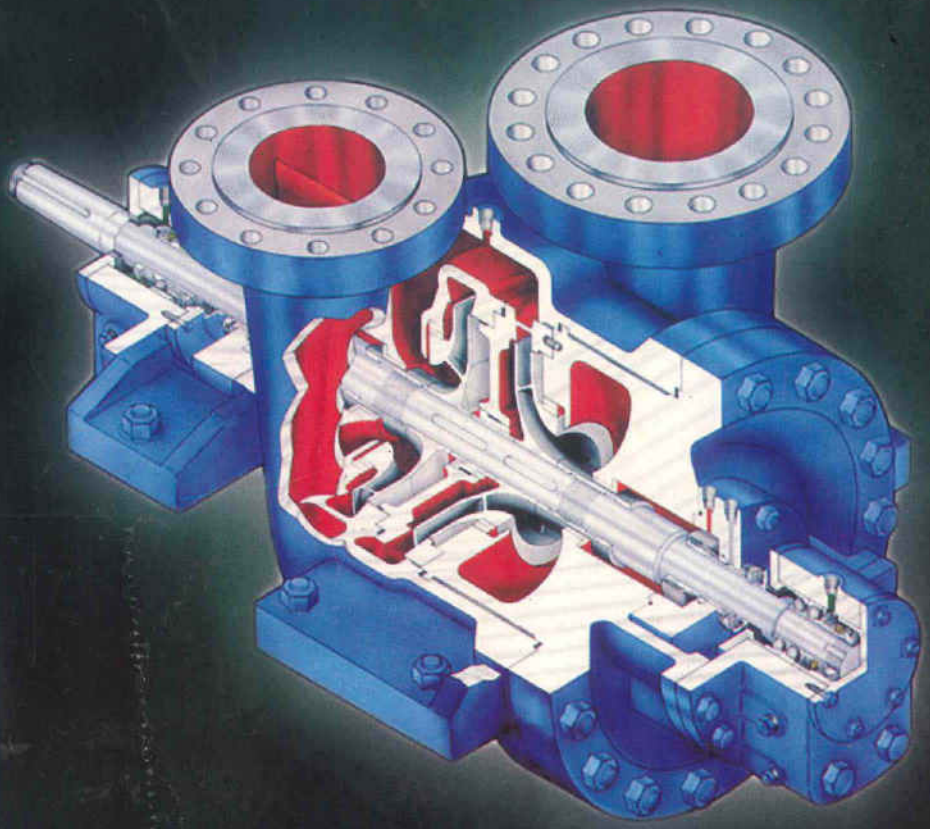

Answers to Exercises 307

References 315

Theory and Design of Hydraulic Machines including Basic Fluid Mechanics

Dr. V.P. Vasandani

KHANNA PUBLISHERS

KH04/6409

Contents

Part-I — Fluid Mechanics

1. Introduction	**1 — 3**
2. Properties of Fluids	**4 — 16**
2.1. Introduction	4
2.2. Specific Weight and Specific Volume	4
2.3. Density	5
2.4. Specific Gravity	5
2.5. Compressibility and Elasticity	5
2.6. Viscocity	6
2.7. Surface Tension	8
2.8. Capillarity	8
2.9. Pressure	9
2.10. Vapor Pressure	9
3. Hydrostatic Pressure and Buoyancy	**17 — 70**
3.1. Hydrostatic Pressure	17
3.2. Intensity of Hydrostatic Pressure	17
3.3. Depth and Pressure	22
3.4. Measurement of Pressure	22
3.5. Pressure on Immersed Surfaces	23
3.6. Some Applications	28
3.7. Graphical Solution	29
3.8. Lock Gates	32
3.9. Pressure Forces on Curved Surfaces	34
3.10. Buoyancy	35
3.11. Centre of Buoyancy	36
3.12. Equilibrium of Floating Body	36
3.13. Meta Centre and Metacentric Height	37
3.14. Experimental Method for Determining Metacentric Height	39
3.15. Theoretical Method for Determining Metacentric Height	40
3.16. Period of Oscillation	42
3.17. Equilibrium of Floating Bodies Containing Liquid	43
3.18. Equilibrium of Moving Fluids	44
3.18.1 Liquid Container with Uniform Acceleration	44
3.18.2 Liquid in Rotating Container	45

4. Principles of Fluid Flow 71—95

4.1. Introduction 71
4.2. One Dimensional, Two Dimensional and Three Dimensional Flow of Fluid 71
4.3. Steady and Unsteady Flow 73
4.4. Compressible and Incompressible Flows 73
4.5. Frictionless Flow and Flow with Friction 74
4.6. Rotational and Irrotational Flow 74
4.7. Stream Lines, Stream Tubes 75
4.8. Equation of Continuity 77
4.9. Euler's Equation 79
4.10. Bernoulli's Equation 81
4.11. Kinetic Energy Correction Factor 84
4.12. Flow with Rotation 85
4.13. Euler's Equations and Rotation of Fluid 87
4.14. Stream Function 88
4.15. Potential Function 89
4.16. Flow Net 90

5. Applications of One Dimensional 96 — 144

5.1. Introduction 96
5.2. Loss Due to Sudden Expansion 96
5.3. Loss of Head Due to Sudden Contraction 98
5.4. Loss of Head at Entrance to Pipe 99
5.5. Loss of Head at Exit of Pipe 99
5.6. Loss of Head due to Obstruction 99
5.7. Loss of Head due to Bends-Valves 100
5.8. Orifices 100
5.9. Submerged and Partially Submerged Orifices 102
5.10. Mouth Pieces 104
5.11. Internal or Borda's Mouth Piece 105
5.11.1 Other Mouth Pieces 106
5.12. Large Orifice 107
5.13. Experimental Determination of C_d, C_v and K_c 108
5.14. Time taken to Empty a Vessel through Orifice 110
5.15. Notches 112
5.16. Velocity of Approach 115
5.17. Weirs 116
5.18. Empirical Formulas 117
5.19. Trapezoidal and Cippoletti Weir 118
5.20. Broad or Thick Crested Weir 119
5.21. Orifice Meter 120
5.22. Nozzle-Meter 124
5.23. Venturimeter 124
5.24. Pitot's Tube 126

6. Dimensional Analysis 145 — 162

6.1. Introduction 145
6.2. Fundamental Units 145
6.3. Method of Analysis (Lord Rayleigh's Method) 146
6.4. Bucklingham's Theorem 147
6.5. Dynamic Similarity 150

7. Flow Through Pipes 163—203

7.1. Introduction 163
7.2. Reynold's Experiments 163
7.3. Laminar or Viscous Flow through Pipes 165
7.4. Darcy's or Weisbach's Equation 168
7.5. Hydraulic Smooth Pipes 171
7.6. Hazen-Williams and other Formulae 173
7.7. Engineering Applications 174
7.8. Hydraulic Gradient 177
7.9. Power Transmission through Pipes 180
7.10. Siphon 183
7.11. Non-Circular Conduits 184
7.12. Velocity Distribution for Turbulent Flow 184
7.13. Moody's Universal Chart for Pipe Friction Factor 193
7.14. Pipeline Problems 194
7.15. Economical Diameter of Pipeline 195

8. Flow Through Open Channels 204 — 226

8.1. Introduction 204
8.2. Empirical Formulae 204
8.3. Efficient Cross-sections 207
8.4. Uniform and Non-uniform Flow through Open Channel 211
8.5. Non-Uniform Flow 211
8.6. Specific Energy 214
8.7. Hydraulic Jump & Other Cases of Non-uniform Flow 216
8.8. Velocity Distribution in Open Channels 222

9. One Dimensional Steady Compressible Flow 227—243

9.1 Introduction 227
9.2 Basic Thermodynamic Relationships 228
9.3 Velocity of Sound in a Fluid Medium 229
9.4 Temperature Change in Compressible Flow 231
9.5 Euler's and Bernoulli's Equations 232
9.6 Critical Mach Number 236
9.7 Flow Through a Vessel 236
9.8 Compressible Flow through Pipe 238
9.9 Flow through Nozzles 241
9.10 Fanno Equation 242

Part - II — Hydraulic Machines

Introduction to Section—I 2 — 11

1. Classification 2
2. Types of Turbines and Pumps 3
3. Head and Discharge 8
4. Efficiency and Losses 9

A. Hydrodynamic Machines

1. General Theory of Hydrodynamic Machines 12 — 52

1.1. Introduction 12
1.2. Momentum Equation 12
1.2.2. Impact of Jet on Fixed and Moving Plates 13
1.3. Velocity Triangles 28
1.4. Propulsion of Ships by Jet 31
1.5.1. Classification of Machines 37
1.5.2. Euler's Fundamental Equation 40
1.5.3. Degree of Reaction 43
1.5.4. Flow Through Hydrodynamic Machine 46
1.5.5. Insufficient Confirmation of One Dimensional Theory 48

2. Hydro-Turbines 53 — 142

2.1. Impulse Turbines 53
2.1.1. Introduction and History 53
2.1.2. Main Components of a Pelton Wheel 56
2.1.3. Flow Through the Bucket of the Pelton Wheel 57
2.1.4. Important Dimensions of Bucket 59
2.1.5. Number of Buckets 61
2.1.6. Ideal Velocity Diagrams 64
2.1.7. Selection of Jet Diameter 67
2.1.8. Speed Ratio 67
2.1.9. Number of Jets 69
2.1.10. Other Impulse Turbines 69
2.2. Reaction or Pressure Turbines 86
2.2.1. Introduction 86
2.2.2. Effect of Modifications 87
2.2.3. Components of a Reaction Turbine 90
2.2.4. Draft Tube 93
2.2.5. Suction Height 98
2.3. Aerodynamic Theory as Applied to Axial Flow Machines 100
2.3.1. Profile Geometry and its Aerodynamic Properties 100
2.3.2. Biot-Savart Law 104
2.3.3. Kutta-Joukowski's Theorem 106
2.3.4. Cascade of Blades 110
2.4.1. Application of Aerofoil Theory 113
2.5. Other Reaction Turbines 115

3. Hydrodynamic Pumps 143 — 183

3.1. Introduction 143
3.2. Component Parts 144
3.3. Suction and Delivery Pipes 145
3.4. Definitions 146
3.5. Number of Stages 149
3.6. Velocity Triangles 150
3.7. Theory of Hydrodynamic Pumps 151
3.8. Minimum Speed of Pump to Deliver Liquid 153
3.9. Effect of Variation of Velocity Diagram from Assumed Ideal Diagram 153
3.10. Pressure Coefficient 154
3.11. Number of Blades 154
3.12. Maximum Permissible Suction Height 155
3.13. Priming and Some Self-priming Devices 156

4. Cavitation 184 — 205

4.1. Introduction 184
4.2. Definitions 184
4.2.1. Net Positive Suction Head (N.P.S.H.) 185
4.2.2. Net Positive Suction Head Required 185
4.2.3. Thoma's cavitation factor 187
4.3. Cavitation Damage 188
4.4. Mechanism of Cavitation Damage 189
4.4.1. Mechanical Action Theory 190
4.5. Tensile Strength of Liquids 192
4.6. Effect of Nuclei 193
4.7. Turbulence and Boundary Layer Effects 194
4.8. Effect of Gas Content, Vapour Pressure and Temperature of the Liquid 194
4.9. Effect of Surface Tension and Impurities 196
4.10. Effects of Viscosity of the Liquid 196
4.11. Effects of Shape of Cavitating Body 196
4.12. Effects of Cavitation 196
4.13. Cavitation Prevention 198
4.14. Cavitation Prevention at the Design Stage 198
4.15. Cavitation Prevention of Installed Hydraulic Machines 200
4.16. Cavitation Detection 201

5. Application of Similarity Considerations to Hydrodynamic Machines 206 — 243

5.1. Introduction 206
5.2. Similarity Considerations 207

5.3. Unit Quantities 209
5.4. Specific Speed 211
5.5. Specific Speed of a Pelton Wheel 213
5.6. Specific Speed of Francis Turbine 214
5.7. Specific Speed of Kaplan Turbine 215
5.8. Classification and Selection of Turbines on the Basis of Specific Speed 215
5.9. Specific Speed of Pumps 218
5.10. Application of Buckingham's Theorem 218
5.11. Effect of Friction 234
5.12. Effect of Cavitation 236

6. Characteristics of Hydrodynamic Machines 244 — 276

6.1. Introduction 244
6.2. Main Characteristics 245
6.3. Operating Characteristic 248
6.4. Constant Efficiency Curves 252
6.5. Suitability of Reaction Turbines for High Heads 253

7. General Theory of Machines-II 277 — 297

7.1. Introduction 277
7.2. Effect of Blade Thickness 278
7.3. Effect of Finite Number of Blades 279
7.4. Effect of Friction 280
7.5. Effect of Relative Eddy 281
7.6. Actual Theoretical Velocity Triangles 282
7.7. Pfleiderer's Coefficient 283
7.8. Selection of Pressure Side Blade 285
7.9. Cavitation 286
7.10. Suction Velocity and Velocity Coefficient 289
7.11. Turbine and Pump Cascades 290
7.12. General Theory of Impulse Machines 293
7.13. Velocity Triangles 294
7.14. Theory and Observations 296
7.15. Bucket Splitter 297

8. Governing 298—320

(a) Governing of Turbines

8.1. Introduction 298
8.2. Main Considerations 298
8.3. Governing Mechanism 299
8.4. Complexities of Governing 301
8.5. Double Regulation of Pelton Wheel 302
8.6. Theory of Governing 303
8.7. Description of Component Parts 304
8.8. Governing of Runner Blades in Kaplan Turbines 305
8.9. Determination of Blade Position for Various Load Conditions 306

(b) Discharge Regulation in Pumps

8.10. Introduction 312
8.11. Methods of Regulation of Pumps 314

9. Hydroelectric Plants 321 — 335

9.1. Introduction 321
9.2. Classification 321
9.3. Essential Parts of Hydroelectric Station 323
9.4. Capacity of Storage Reservoir 328
9.5. Variation of Head 331

10. Summary and Problems 336—390

11. Hydrodynamic Transmission 391 — 397

11.1. Introduction 391
11.2. Hydraulic Coupling 391
11.3. Torque Converter 393
11.4. General Theory 394

12. Miscellaneous Hydrodynamic Pumps 398 — 417

12.1. Introduction 398
12.2. Self-priming Pumps 398
12.3. Bore Hole Pumps 403
12.4. Non-clog Pump 408
12.5. Chemical and Process Pumps 411
12.6. High Speed Processes Pumps 414
12.7. Other Multipurpose Hydrodynamic Pumps 417

B. Positive Displacement Machinery

13. Reciprocating Pumps 418—459

13.1. Introduction 418
13.2. Working of Single Cylinder Single Acting Reciprocating Pump 418
13.3 Indicator Diagram 420
13.4. Effect of Piston Acceleration on Indicator Diagrams 422
13.5. Effect of Pipe Friction on Indicator Diagram 424
13.6. Other Pump Losses 425
13.7. Cavitation 427
13.8. Negative Slip 428

13.9. Double Acting Single Cylinder Pump 428
13.10. Multi-cylinder Pumps 430
13.11. Air Vessels 431
13.12. Calculations for Air Vessel 436
13.13. Calculations for Valves 441
13.14. Specific Work of a Reciprocating Pump 445

14. Miscellaneous Hydraulic Machines 460 — 486

14.1. Introduction 460
14.2. Gear Pumps 460
14.3. Rotating Cylinder Pumps 467
14.4. Parallel Cylinder Pump 470
14.5. The Screw Pumps 472
14.6. Open Screw Pump 474
14.7. Hydraulic Accumulator 475
14.8. Hydraulic Intensifier 477
14.9. Hydraulic Jack 478
14.10. Hydraulic Crane 479

15. Other Hydraulic Pumps 487 — 518

15.1. Hydraulic Ram 487
15.2. Jet Pumps 490
15.3. Injector Pumps 501
15.4. Air Lift Pump 504

C. Design of Hydrodynamics Pumps

16. Design of Hydrodynamic Pumps 519 — 521

16.1. Design Data 519
16.2. Effect of Manufacturing Schedule 520
16.3. General Design Outline 520
16.4. Design Procedure 521

17. Additional Theoretical Considerations 522 — 543

17.1. Introduction 522
17.2. Euler's Equation 522
17.3. Theoretical Pump Characteristic 523
17.4. Effect of Non-uniform Velocity Distribution 526
17.5. Axial Entrance Velocity 528
17.6. Blade Outlet Angle 531
17.7 Number of Blades and Length of Blade 533
17.8 Slip Factor—Pfliederer's Coefficient, Stodola's Method & Busemann's Method 535

18. Design of Radial Flow Impeller 544 — 573

18.1. Introduction 544
18.2. Efficiency 544
18.3. Shaft Diameter 546
18.4. Design of Suction Passage 547
18.5. Design of Pressure Side 549
18.6. Design Blade Shape 551
18.8. Design of Pump Volute 557
18.9. Volute with Circular Cross-section 561

19. Design of Mixed Flow Pumps 574 — 590

19.1. Introduction 574
19.2. Meridional Stream Lines 575
19.3. Determination of Vane Edges 576
19.4. Design of Blade Shape 577
19.5. Pattern Makers or Boards Sections 583

20. Design of Axial (Propeller) Pumps 591 — 611

20.1. Introduction 591
20.2. Special Consideration 591
20.3. Maximum Permissible Hub Ratio 592
20.3.1 Design Procedure 594
20.4. Design of Blade Shape 595
20.5. Design of Blade Cylinderical Sections based on Aerodynamic Theory 596
20.6. Design of Impeller Based on Aerodynamic Principles 601
20.7. Board Section or Pattern Maker's Sections 604

Appendices 612 — 615
A. Surge Tanks 612

Bibliography 616—617

Index 618—624

Part A—Fluid Mechanics
Part B—Basic Hydraulic Machines
